

# GLOBE *Claritas*

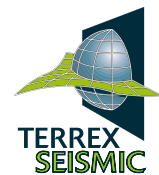

seismic processing with no constraints

# Globe Claritas

## Selection of existing clients:

“We have been impressed with the Globe Claritas technical support team and their responsiveness. We have also developed a very good working relationship, and Quantum and Globe Claritas have worked together on several R&D projects to include additional advanced imaging technologies and software routines”

*Sami Khan – Quantum Geoservices*

“Claritas has enabled us to have QC and processing capabilities to the same level of the major global acquisition players”

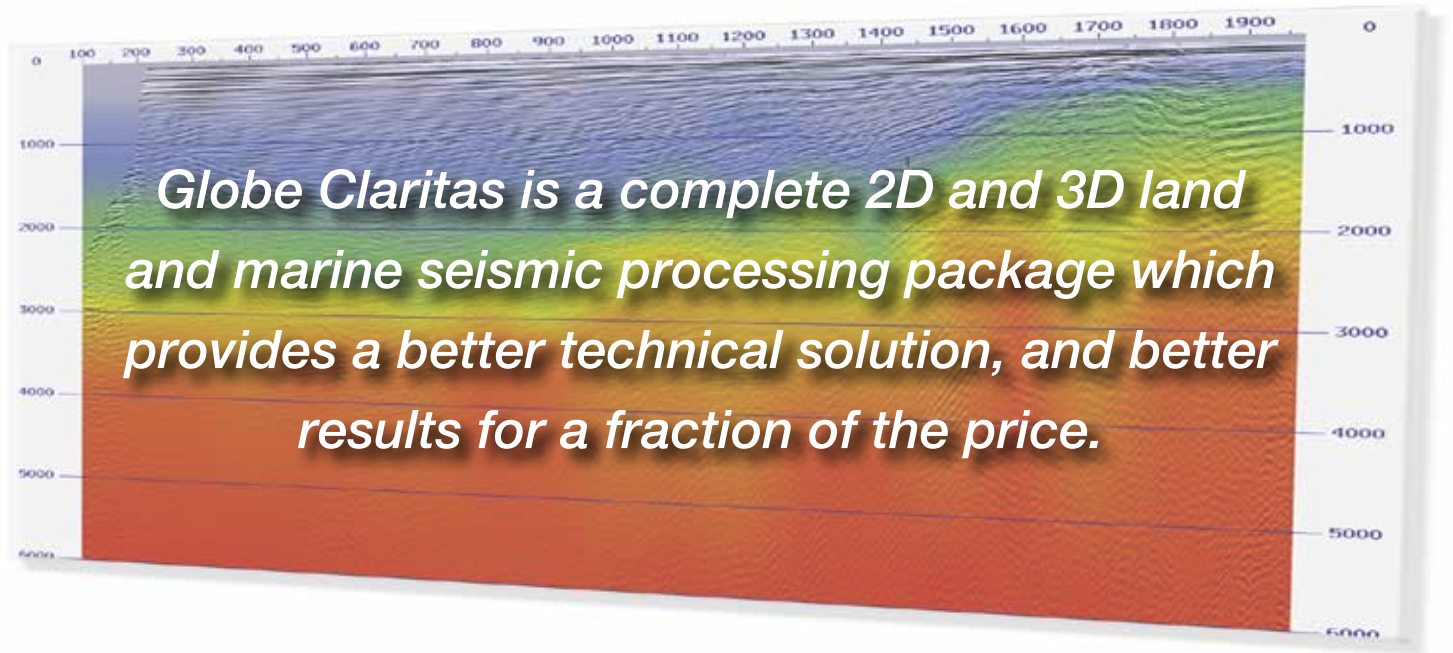

*Reflect Geophysical*

“This is a genuinely powerful addition to our processing suite, with powerful QC and interactivity”

*Spectrum ASA*

# a better solution

*Are you looking for...*

- ... a scalable processing solution that grows with your business?
- ... a tailored software solution that suits your business needs, be it for field QC or full data processing?
- ... a cost effective quality product that allows your company to compete with the bigger players?

**GLOBE Claritas is the solution you are looking for.**

With over 250 processing modules, editors, processing flows, utilities and graphical applications, Globe Claritas is a sophisticated seismic processing software package.

It has been developed over 20 years by geophysicists at GNS Science, New Zealand's premier geoscience provider.

The Globe Claritas team is constantly developing and updating the software, and is highly responsive to customer requests. It's a user-driven development philosophy with quick release cycles, and pro-active support.

Talk to our sales team to explore the best possible licensing schemes to fit perfectly around your needs.
